In the crowded world of specialty support surfaces, the PressureGuard® series truly stands apart. Packed with technical innovations, every PressureGuard model combines the effectiveness of an air flotation system with the unmatched stability and safety of a multi-component engineered foam shell:

1. **Premium healthcare fabrics**
   Vapor barrier cover is fluid-proof, cleanable, self-deodorizing, and antimicrobial.

2. **Time-tested Geo-Matt® Design**
   Clinically-proven Geo-Matt® design creates a unique, anti-shearing top surface. 800 individually responsive cells in distinct head, torso, and foot zones enhance therapeutic support and comfort. (see page 25)

3. **Protective Heel Slope®**
   Exclusive Heel Slope® feature redistributes load to pressure-tolerant lower legs and calves. Subtle taper reduces heel pressures while providing complete foot support.

4. **Supportive “Safety Edge™”**
   Unlike air-only surfaces, PressureGuard’s edge won’t collapse under a user’s weight. Sturdy outer bolster maintains firm support, while slotted inner bolster compresses slightly, angling inward toward mattress center.

5. **The “Safety Edge” advantage:**
   - **On air-only surfaces**, edge collapses when user nears side. Nothing prevents user from rolling off or becoming entrapped under siderail.
   - **On PressureGuard**, two-part bolster system directs user toward mattress center, away from edge and siderail hazards.

6. **The “Safety Edge” advantage also:**
   - **On air-only surfaces**, user can slide off bed as edge collapses beneath his weight.
   - **On PressureGuard**, two-part bolster creates a wedge effect. Supports seated user on mattress edge, adding safety to egress and entry.

NOTE: For more on bed safety see page 23.
Clinicians choose low air loss systems to address maceration, the weakening of the skin due to excess moisture. The PressureGuard Easy Air is independently documented to outperform every leading low air loss system in this key performance area. Remarkably, it does so with none of the compromises low air loss prescribers have come to accept, thanks to its exclusive Air Diffusion Matrix™ technology and patented PressureGuard air/foam design.

Easy Air maintains inflation in a power outage. Its stable surface won’t “swallow up” the user. And its Safety Edge™ won’t collapse, making transfers safer. Doesn’t make the user too hot or too cold, either. Ultra-simple to set up, clean and use. Selectable comfort level. “On/Off” buttons control air flow and alternating pressure features separately.

System includes mattress, controller unit and machine washable coverlet.

**Quick Facts**

**PressureGuard Easy Air®**

**Primary Use:**
- Aggressive Treatment (through Stage IV)

**Patient Indications:**
- Excessive maceration contributes to development of skin breakdown
- Any stage ulcer where maceration is a contributing factor
- Prevention for those at high risk of skin breakdown (e.g. Braden score 12 or less)

**Key Advantages:**
- Documented superiority in moisture removal
- Won’t deflate in power outage
- Includes alternating pressure mode
- PressureGuard® design: stability, safety, anti-shearing

* Allow up to 10 working days lead time for this size.

Complete System Includes Mattress, Control Unit, and Coverlet.

To order Coverlet only, add “CLT-” to part number (example: CLT-L8035).

Medicare Approved: E0277 (Group II)

Weight limit: 500 lbs.

Warranty: 2 years, non-prorated

Mattress Weight: 22 lbs.

UL listed: Yes

All models are fire barrier version (FBV) as indicated by “-29” suffix, denoting certified conformance to NFPA 101 (Life Safety Code), Cal Tech Bulletin #117, 16 CFR Parts 1632 and 1633, and BFD IX-11.
Unmatched Microclimate Management – Plus Two Dynamic Therapies.

The all-in-one Easy Air LR model puts caregiver just a button-push away from a powerful, additional treatment modality: Continuous Lateral Rotation Therapy (CLRT). The unique PressureGuard approach to CLRT has been documented to help wounds close more than three times faster than on other commonly provided air therapy surfaces1. But beyond pure pressure management, CLRT gives caregivers a versatile tool that is indicated for a wide variety of user needs.

Additional bariatric options available – see page 22.
PressureGuard® APM²

Category: Alternating Pressure with Basic Lateral Rotation

Alternating Pressure or Lateral Rotation – at the Flip of a Switch!

With its two distinct therapy modes, the PressureGuard APM² gives you twice the treatment options. Twice the flexibility. Twice the value.

Change instantly and easily from alternating pressure to basic lateral rotation with a single, recessed toggle switch. Requires no disconnecting or exchanging of air lines.

Deluxe control unit includes audible and visual low pressure indicator. This silent, reliable, maintenance-free control unit allows simple adjustment for user comfort. The user experiences subtle but effective alternating pressure or lateral rotation in ten-minute cycles. These dual therapies combine with the patented PressureGuard air/foam design to deliver outstanding tissue load management in any care setting.

QUICK FACTS
PressureGuard® APM²

Primary Use:
• Aggressive Treatment (through Stage IV)

Patient Indications:
• Can’t or won’t reposition frequently
• Can be positioned off of ulcer in at least 2 positions
• Prevention for those at high risk for skin breakdown (e.g. Braden score 12 or less)

Key Advantages:
• Two therapies in one mattress
• Single switch operation
• PressureGuard® design: stability, safety, anti-shearing

Deluxe control unit
• Low pressure indicator light
• Selectable audible alarm
• Torque-free ports
• Hospital-grade plug
• Heavy-duty hooks

PressureGuard® APM² Safety Supreme

Category: Multi-Mode Air Therapy with Raised Safety Perimeter

The Ultimate in User Safety, Treatment Flexibility and Skin Integrity.

Combines all the features of the top-selling PressureGuard® APM², plus the added safety benefits of raised perimeter edges. The Safety Supreme incorporates the patented Geo-Mattress with Wings® raised perimeter design to help prompt the user away from the edge of the bed. Provides protection from pressure ulcers, falls, fire, restraints and siderail entrapment – all in one easy-to-use package.

PressureGuard Turn Select®
Category: Programmable Lateral Rotation Therapy

Customized Lateral Rotation – 24 Hours a Day!

Slowly, gently, and quietly rotates the user laterally up to 30 degrees, with dwell times as short as 1 minute and as long as 2 hours. Hand-held pendant allows convenient programming of the system’s four operating modes. Provides caregiver the flexibility to select a standard turning program, or to create a pattern fully customized to the patient’s condition.

Ultra-compact, microprocessor controlled pump is integrated directly into the mattress, leaving no bulky pump or external air lines to contend with. Just hour after hour of whisper quiet, trouble-free operation. Maintains proper inflation and support during power loss until power is restored and rotation can be resumed. Includes CPR mode (provides an extra-firm surface for performing CPR with a crash board), program lock-out, and CPR alarm.

QUICK FACTS
PressureGuard Turn Select®

Primary Use:
- Aggressive Treatment (through Stage IV)

Patient Indications:
- Manual turning prohibited by pain
- Can’t be positioned off ulcer
- User requires customized turn pattern
- Prevention for those at very high risk (e.g. Braden score of 9 or less)

Key Advantages:
- Pendant controlled, no external pump
- Standard or customized roll patterns
- Won’t deflate in power outage
- Ultra-quiet
- PressureGuard® design: stability, safety, anti-shearing

PressureGuard® Bariatric APM

Category: Bariatric Alternating Pressure

Feature-Packed Therapy for Users up to 750 lbs.

Segmented top reduces sharp pressure drop-offs, while air system below handles the “heavy lifting,” alternating weight-bearing across the surface in user-selectable intervals. “Two up, one down” inflation pattern ensures maximum patient support throughout the cycle.

Powerful Digital Control Unit
- Up to four times the air output of conventional units.
- Eight electronically-controlled comfort settings.
- Programmable cycle times of 20, 25, 30 or 35 minutes.
- Low pressure indicator and audible alarm.

Additional bariatric options available – see page 22.

All models are fire barrier version (FBV) as indicated by “-29” suffix, denoting certified conformance to NFPA 101 (Life Safety Code); Cal Tech Bulletin #117; 16 CFR Parts 1632 and 1633; and BFD IX-11.

Quick Facts
PressureGuard® Bariatric APM

Primary Uses:
- Aggressive treatment (through Stage IV)
- Prevention of pressure ulcers in sedentary or high risk patients

Patient Indications:
- Can’t or won’t reposition frequently
- Can be positioned off of pressure ulcer

Key Advantages:
- Simple operation
- Gentle and effective pressure changes
- Customizable firmness and time settings
- PressureGuard design: stability, safety, anti-shearing

Powerful Results – Without Power

The revolutionary PressureGuard CFT’s patented Constant Force Technology® automatically adjusts a network of interconnected air cylinders and elasticized reservoirs to the appropriate, therapeutic level, regardless of the user’s weight or position.

The CFT non-powered system is approved for reimbursement as a Group II support surface, based on head-to-head studies in which it outperformed leading powered systems in ulcer healing.

The CFT is extremely cost effective. Requires virtually no set-up, programming, or maintenance. Wipes clean. Generates no noise or heat and uses no electricity, making it immune to power interruptions. Use it in-facility to slash rental costs, increase user satisfaction, and improve regulatory compliance on issues from skin care to bed safety. Or, select it as a trouble-free but supremely effective option for at-home users.

As user shifts position, reservoirs absorb displaced air to accommodate load and re-equalize pressures.

---

**Primary Use:**  
- Treatment of any stage pressure ulcer  
- Prevention of skin breakdown in the high-risk patient

**Patient Indications:**  
- Any stage ulcer  
- Can be positioned off of ulcer in at least 2 positions  
- Highest risk for skin breakdown, or severely compromised (e.g. Braden score 12 or less)  
- History of pressure ulcer(s)  
- Repositions infrequently  
- Poorly padded bony prominences

**Key Advantages:**  
- Proven for both ulcer healing and prevention  
- Outperforms powered systems for wound healing*  
- Medicare covered (non-powered Group II)  
- No controls to adjust  
- No reliance on power source  
- PressureGuard® design: stability, safety, anti-shearing

*Studies available upon request
PressureGuard® Series
In-Home Styles

When ordering, customer must specify if the dynamic air therapy should be positioned in the Center of the mattress (for single user), or on the Patient's Right Side (for two users or a single user who cannot/preferences not to move to the center of the mattress). Note: “Patient Right” is with patient in a backlying position.

* To accommodate a Dual (split) King surface, 80"L x 78" W, order this item together with our matching non-powered air mattress (RW8038-29) for the other half of the bed.
** 1 or 2 users.

Non-prorated warranty: 18 months (APM; Deluxe); 2 years (Turn Select), 5 years (CFT).
Cover cleaning: Wipe clean with neutral suds or approved cleaning agents. Avoid bleach.
Lead times: Allow up to 10 working days lead time for all sizes.
Shipping: All In-Home Style units ship fully assembled in a flat carton via common carrier.
UL Listing: Easy Air conforms to UL2601-01; APM/ Deluxe conforms to UL 544.

See individual product brochures for complete technical specifications.
PressureGuard® Custom Care® Convertible Series

With its innovative “Star Chamber” design, the PressureGuard® Custom Care® Convertible Series delivers an unmatched combination of outcomes, comfort and safety – plus all the treatment flexibility associated with convertible surfaces.

Putting the “air” back in air therapy

Typical non-powered reactive surfaces have been a product of compromise. They are expected to deliver high-end therapy, like an air treatment surface. But their foam foundation is little different than a simple foam mattress. While this typical system design can provide some measure of effectiveness, the foam construction ultimately limits what it can achieve.

Span-America knew there was a better way to provide non-powered therapy. The result is the revolutionary PressureGuard Custom Care Convertible Series. Its innovative design maximizes the essential component of true air therapy: air!

The secret lies in the innovative Star Chamber™ (patent pending) design of the air support cylinders. Using simple physics, this closed, air-filled system provides a combination of immersion, pressure redistribution, and comfort impossible to achieve with typical non-powered surfaces.

Custom Care Convertible surfaces also incorporate a long and clinically proven line of patented Span-America innovations in shear management, active and reactive therapies, maceration control, and patient safety. Plus, add-on therapy modalities – including lateral rotation, alternating pressure, and low air loss – can provide greater treatment flexibility. And that means better care for those under your care.

Convertibles: maximizing options & outcomes

Custom Care Convertible air therapy:
- helps prevent nosocomial pressure ulcers
- provides ulcer treatment through Stage IV

Add-on powered control units instantly provide capability for:
- alternating pressure
- lateral rotation
- low air loss

As a result, caregivers can:
- save money on expensive surface rentals
- provide superior outcomes
- improve patient safety via fall prevention and entrapment avoidance
- ensure outstanding comfort and stability
- avoid “never events”: nosocomial ulcers, fall-related injury
Air is the star

The revolutionary part of the PressureGuard Custom Care Convertible and Convertible LAL surfaces starts deep within the surface, in the Star Chamber air cylinders. Far more than foam-filled “air” systems, the Star Chamber design creates a true air system that is constantly filled with air—whether or not the surface is powered.

- air is a superior pressure redistribution and immersion medium
- cross-connected elasticized reservoirs absorb peaks to mimic powered flotation
- four body-length air cylinders provide greater air displacement and better weight distribution than typical side-to-side cylinder configurations
- the points of the star-shaped core ensure maximum air volume
- the closed air system requires no refilling or maintenance for 5 years

Air superiority

While they can be somewhat effective, foam-filled systems are limited by physics. But true air therapy provides the pathway to dramatically improved outcomes. It all starts with what’s on the inside.

Foam:
- a solid
- inhibits ideal pressure redistribution
- limits active therapies

Air:
- a fluid
- facilitates ideal pressure redistribution
- maximizes active therapies

A typical foam-filled “air” sector:
- is only 5% air by volume
- provides only 5% support from air
- derives 95% support from foam

A Star Chamber™ air cylinder:
- is only 60% air by volume
- provides 92% support from air
- derives only 8% support from foam

Shear Transfer Zone™ design

In addition to the Geo-Matt® segmented top surface, Span-America’s exclusive Shear Transfer Zone™ provides an additional measure of shearing protection in the form of the silicone-coated, shear-minimizing fabric bands located on the underside of the bi-directional stretch cover.

This Shear Transfer Zone design helps:
- Prevent heels, sacrum, and scapula from “digging into” surface
- “Glide” user back to original position following HOB elevation
- Protect against damaging effects of micro shear, macro shear, and rotational (pivot-induced) shear
- Provide patient stability by transferring shear to more shear-tolerant anchor points
Setting the new standard in convertible air therapy

PressureGuard® Custom Care® Convertible surfaces represent the next generation of time-tested PressureGuard air therapy surfaces. In peer-reviewed studies, non-powered1 and powered2 PressureGuard surfaces outperformed traditional powered surfaces in wound healing through Stage IV.

Custom Care Convertible mattresses feature the innovative Star Chamber system engineered with air support cylinders that are constantly filled with air — whether or not the surface is powered. Even in their non-powered state, the air cylinders’ body-length orientation provides greater air displacement and better weight distribution than typical side-to-side cylinder configurations, and the cross-connected elasticized reservoirs absorb peaks to mimic powered flotation.

The Star Chamber design makes powered therapies more effective as well. Add-on powered control units instantly provide capability for alternating pressure and lateral rotation, offering greater treatment flexibility.

**PressureGuard® Custom Care® Convertible LAL**

**Category:** Convertible with low air loss, alternating pressure, lateral rotation

---

**QUICK FACTS**

**PressureGuard® Custom Care® Convertible LAL**

**Primary Use:**
- Recommended for use in treatment through Stage IV ulcers

**Patient Indications:**
- Excessive maceration contributes to development of skin breakdown
- Any stage ulcer where maceration is a contributing factor
- Prevention for those at high risk of skin breakdown (e.g. Braden score 12 or less)

**Key Advantages:**
- Effective pressure transfer through Geo-Matt® surface geometry and dual heel protection
- Reduced maceration through continuous airflow via Air Diffusion Matrix™ layer
- More effective powered therapies through the Star Chamber™ design
- Easy-to-use control unit with quick-connect air lines and push-button therapy selection

---

**Industry-leading microclimate management—now in a convertible!**

By its very design, the PressureGuard® Custom Care® Convertible LAL delivers improved patient outcomes for moisture control and tissue load management—with the added benefits associated with convertible surfaces.

The inner air delivery cover of the Custom Care Convertible LAL features a dedicated air supply and continuous airflow through its Air Diffusion Matrix™. This innovative design sweeps away moisture vapor before it can re-form as a liquid, helping to reduce maceration. Furthermore, with the powered control unit, the low air loss treatment helps to control excess moisture and removes excess heat at the microclimate level via moisture management.

Effective pressure management is possible through a number of exclusive design features, including our Geo-Matt® surface geometry and the gentle Heel Slope® of our dual heel protection.

CLCA8029 | Custom Care Convertible LAL 80” for CareAssist®
CLCA8429 | Custom Care Convertible LAL 84” for CareAssist®

**Control Unit:**
- CL8400: Add-on control unit for Custom Care Convertible LAL*

**Medicare Approved:**
- E0373 (Group II) (without control unit)
- E0277 (Group II) (with control unit)

**Weight limit:**
- Supports up to 500 lbs. (non-powered & alternating modes)
- Supports up to 350 lbs. (lateral rotation mode)

**Weight:**
- Mattress: approximately 34 lbs.
- Control unit: 12.5 lbs.

**Warranty:**
- Mattress: 5 years, non-prorated
- Control unit: 2 years, non-prorated

**UL listed:**
- Yes

**Flammability:**
- All models conform to NFPA 101 (Life Safety Code), Caltech bulletins # 117, 129, and 603, CPSC 16 CFR Parts 1632 and 1633

*Hill-Rom is a mark, and CareAssist® is a registered mark, of Hill-Rom® Services, Inc.*

If you’re considering a non-powered reactive pressure redistribution surface, choose the one that is designed to outperform the others. Span-America’s PressureGuard® Custom Care® surface provides effective, non-powered pressure redistribution through its outstanding combination of a zoned, shear-reducing, engineered outer shell surrounding a reactive support chamber system.

Custom Care’s unique Metered Immersion™ design reacts to changes in surface loading through a series of interconnected longitudinal support chambers. As the user moves or repositions on the surface, the chambers below react in concert — deflecting, transferring air, and venting — in relation to the user’s weight and position. The result is a blend of pressure management, shear reduction, comfort, and ease of operation not achievable with other non-powered systems.

### QUICK FACTS

**PressureGuard® Custom Care®**

**Primary Use:**
- Recommended for use in prevention and treatment of Stage I and II pressure ulcers, and treatment of uncomplicated Stage III and IV ulcers with multiple turning surfaces.

**Patient Indications:**
- Can be positioned off of ulcer in at least 2 positions
- Highest risk for skin breakdown, or severely compromised (e.g. Braden score 12 or less)
- History of pressure ulcer(s)
- Repositions infrequently
- Poorly padded bony prominences

**Key Advantages:**
- Minimal shearing through Geo-Matt® surface geometry and Shear Transfer Zones on bi-directional stretch cover
- Maintenance-free support chambers require no adjustment or refilling
- No initial set-up necessary

Geo-Mattress® Series

Though they address different categories of need, the Geo-Mattress Max®, Plus®, Pro, with Wings, Atlas and new UltraMax models have much in common. All are protected by covers made from wipe-clean, moisture-proof, anti-microbial fabrics. More importantly, each includes exclusive design innovations that solve problems left unaddressed by other foam mattress replacements:

Exclusive Geo-Matt® Design
Clinically-proven Geo-Matt® design creates a unique, anti-shearing top surface. 800 individually responsive cells in distinct head, torso, and foot zones enhance therapeutic support and comfort. (see page 25)

Hidden Zipper Design
For easier, more thorough cleaning and superior infection control.

Protective Heel Slope®
Heel Slope® feature redistributes load to pressure-tolerant lower legs and calves. Subtle taper reduces heel pressures while providing complete foot support. Because foot remains level with heart, slope does not facilitate dependent edema.

Other surfaces are flat, and can’t conform to the shape of the lower leg, especially behind the Achilles tendon.
Result: Heel must bear excess load, and skin will break down more easily.

The Geo-Mattress Heel Slope® slightly lowers the heel, allowing the mattress to fill in the space behind the Achilles tendon.
Result: Pressure is distributed over the entire lower leg, reducing pressure on the heel.
Geo-Mattress® UltraMax™
Category: Reactive Pressure Redistribution Support Surface

Designed to exceed even the most rigorous requirements of the acute care environment.

Precision-engineered to deliver critical performance advantages inside and out! On the outside, the inindividually articulating cells of the clinically proven Geo-Matt® top surface combine with Span-America’s proprietary Shear Transfer Zone™ design to provide unmatched protection from the harmful effects of microshear, macroshear and rotational shear. Helps reduce caregiver injury by “gliding” the user back to position following head of bed elevation. On the inside, the 3-Dimensional Zoning™ core design of the UltraMax provides anatomically calibrated levels of support and unmatched user comfort. And in the seat area — where the mechanical fatigue of bed gatching and concentrated user weight affect durability most — the unique cell structure of the high resiliency UHP 500™ layer provides a 55% higher Support Factor than found in typical medical grade foams. Viscoelastic foam and gentle Heel Slope® provide added protection at vulnerable heels.

QUICK FACTS

Geo-Mattress UltraMax

Primary Use:
• Prevention and early intervention of pressure ulcers

Patient Indications:
• Moderate to high risk for skin breakdown
• Decreased mobility
• Repositions frequently by self or caregiver
• Stage I or II pressure ulcers

Key Advantages:
• Minimized shearing thru Geo-Matt® surface geometry and Shear Transfer Zones™ within stretch cover (see description on page 13)
• Outstanding comfort for longer, more restful sleep
• Superior in-bed mobility, caregiver ergonomics
• Enhanced durability, protection from “bottoming out”.

**Geo-Mattress® Max®, Plus® and Pro**

**Category:** Therapeutic Foam Mattresses

### Geo-Mattress® Max®

- **High-end protection**
- Three-tier, zoned design.
- Luxurious viscoelastic “memory foam” foot section cradles and protects the heel. Firm perimeter bolsters for added safety.

**PLANTING**

- 75"L x 35"W x 6"H
- 78"L x 35"W x 6"H
- 80"L x 32"W x 6"H
- 80"L x 35"W x 6"H
- 84"L x 35"W x 6"H

### Geo-Mattress® Plus®

- **Performance... Plus!**
- Dual-layer, progressive-resistance design perfectly blends patient comfort and clinical effectiveness.

**PLANTING**

- 75"L x 35"W x 6"H
- 78"L x 35"W x 6"H
- 80"L x 32"W x 6"H
- 80"L x 35"W x 6"H
- 84"L x 35"W x 6"H

### Geo-Mattress® Pro

- **Affordability and Effectiveness**
- Single layer, zoned construction delivers excellent value for budget-conscious facilities.

**PLANTING**

- 75"L x 35"W x 6"H
- 78"L x 35"W x 6"H
- 80"L x 32"W x 6"H
- 80"L x 35"W x 6"H
- 84"L x 35"W x 6"H

**Also available:** Geo-Mattress® Pro RP

All of the features of the Geo-Mattress® Pro with the added safety of our supportive Raised Perimeter to help prevent user injury.

### QUICK FACTS

**Geo-Mattress Series**

**Primary Use:**
- Prevention of pressure ulcers

**Patient Indications:**
- General patient population
- Moderate — High Risk for skin breakdown
- Decreased mobility
- Repositions frequently by self or caregiver

**Key Advantages:**
- Geo-Matt® anti-shearing surface
- Heel Slope®
- Hidden zipper for infection control

---

All models are fire barrier version (FBV) as indicated by “-29” suffix, denoting certified conformance to NFPA 101 (Life Safety Code); Cal Tech Bulletin #117; 16 CFR Parts 1632 and 1633; and BFD IX-11.
The supportive, raised perimeter of our popular Geo-Mattress with Wings can help prevent resident injury. Instead of the same exposed, hard bolsters others use, its raised perimeter features a tissue-friendly Geo-Matt surface from edge to edge. By gently urging the user away from the edge of the bed, its tissue-friendly raised perimeter can help reduce the risk of accidental falls. And when bed rails are in place, Geo-Mattress with Wings can help keep the user away from potentially hazardous positions between the rail and the mattress, as well as from contact with the rails themselves. Boasting all the key benefits of the Max, Plus, and Pro, Geo-Mattress with Wings means safety for your residents – and their skin!

**QUICK FACTS**

**Geo-Mattress with Wings**

**Primary Use:**
- Minimize fall risk due to independent exits from bed

**Patient Indications:**
- General patient population
- Moderate – High Risk for skin breakdown (e.g., Braden score ≥ 10)
- Decreased mobility
- Repositions frequently by self or caregiver

**Key Advantages:**
- Edge-to-edge anti-shearing surface
- Extra-firm edge bolster
- Shearing protection at transfer opening
- Heel Slope®

**Geo-Mattress Atlas**

**Category:** Bariatric Therapeutic Foam Mattress

**Heavy Duty Protection for your “Heftiest” Skin Integrity Challenges**

The key features of the clinically proven Geo-Matt series, enhanced to meet the unique pressure management challenges of the bariatric client. On top, the Geo-Matt design. Its 800 independent support cells protect against the damaging effects of friction and shearing – two major risk factors that increase dramatically when bed mobility and safe transfers are impeded by obesity. Beneath it, three high-resiliency layers offer progressively firmer levels of support. And at the foot, the proven Heel Slope® taper provides added protection for the heel and ankle. All protected by a fluid-proof cover and non-prorated 3-year warranty.

**Quick Facts**

**Geo-Mattress Atlas**

**Primary Use:**
- Prevention of skin breakdown

**Patient Indications:**
- Patient is 350-600 lbs.
- At risk for skin breakdown

**Key Advantages:**
- Progressive resistance accommodates wide range of patient weights
- Geo-Matt® anti-shearing surface
- Heel Slope®

Geo-Mattress® HC

Category: Therapeutic Home Care Foam Mattress

Specifically designed to aid in pressure ulcer prevention in the home care setting. Geo-Mattress HC is cut from a single layer of high-quality, combustion modified foam in a fluid-proof, nylon and vinyl cover. Cross-cut top surface is segmented in three distinct zones. Folded and boxed to save freight and storage.

Note: This product does not include Heel Slope® feature.

Geo-Mattress® 350

Category: 6” Therapeutic Foam Mattress

High-value option meets multiple needs. Segmented top surface, 6” height and fluid-proof cover make the new 350 a great choice for heavier home care patients. Or, an economical yet effective option for long term care residents.

Gel 80™

Category: Gel/Foam Mattress Overlay

The Gel-80™, an advanced Group 1 support surface gel/foam overlay, delivers effective pressure redistribution by encapsulating multiple gel bladders within a high-density sculpted support base. Features include a wipe-clean, fluid-impervious fabric top surface, elastic corner straps and one-piece construction. Folded and boxed for easy shipping and storage.

Non-prorated warranty: 2 years (Easy Air), 18 months (APM), 5 years (CFT), 3 years (Atlas).

Cover cleaning: Wipe clean with gentle suds or approved cleaning agents. Avoid bleach.

* Lead times: Allow up to 10 working days from time of order for shipment for items noted by an asterisk (*).

Shipping: All models ship fully assembled in a flat carton via common carrier.

UL Listing: APM conforms to UL 60602-1, CAN/CSA C22.2 NO.601.1.

Easy Air conforms to UL 60601-1, CAN/CSA C22.2 NO.601.1.
### Special Resource Section:

#### Entrapment Prevention & Bed Safety

Reporting of several hundred deaths and injuries due to patient entrapment within the bedframe-mattress system resulted in the formation of the Hospital Bed Safety Workgroup (HBSW) in 1999. The HBSW identified seven zones of possible entrapment, and proposed measurements of these zones to minimize risk of entrapment and death. The FDA issued guidance titled "Hospital Bed System Dimensional and Assessment Guidance to Reduce Entrapment" on March 10, 2006, and recommended dimensions and measuring instructions for the first 4 zones only. The following chart is modified from the Corrective Actions Guidelines of the HBSW. Reference website: http://www.fda.gov/cdrh/beds.

</table>

The FDA did not make dimensional recommendations on Zones 5-7 at this time. However, these Zones can put the patient at risk for entrapment, and should be areas of concern.

1 Hospital Bed Safety Workgroup is a partnership between representatives of the medical bed and mattress industry, national healthcare organizations, patient advocacy groups, the Veteran’s Administration, the FDA, other federal agencies, and international organizations.
Statistics don’t lie. Despite the best efforts of the healthcare community, falls by nursing home residents and hospital patients do occur. When they do, the physical, legal, and financial impact can be devastating to all involved.

Span-America’s new Risk Manager™ bedside safety mat is designed to help.

The Risk Manager is engineered from an ultra-tough, impact-absorbing lightweight elastomeric gel compound commonly used in expensive orthotics and premium footwear.

Independent laboratory testing (see chart) verifies that the Risk Manager greatly reduces the peak G-forces generated by falls, easily surpassing the impact reduction provided by thicker, bulkier gym mat-style pads. It also outperforms the most commonly purchased specialty fall strip, which relies on the same low-tech foam scrap padding typically found under residential carpeting.

**Minimize the Impact of Falls – On Your Residents and On Your Facility.**

**Premium elastomeric gel surface reduces impact from falls.**

**Bonus: Provides welcome comfort for caregivers.**

**Nano-silver throughout protects mat from stains, odor-causing bacteria, mold and mildew. Mat wipes clean with most standard cleaning agents.**

**Slide-resistant bottom surface grips floor, helps keep mat in place. Textured top provides added safety.**

**Low profile and beveled edge allow easy on and off for wheelchairs and lifts.**

**Not a trip hazard, unlike bulky gym-style mats. Thin, stable surface means staff won’t move Risk Manager from beside bed.**

**Risk Manager™**

**Category: Bedside Safety Mat**

**Warranty:** 1 year

**Weight:** 6 lbs. (24”), 9.5 lbs. (36”)

**Flammability:** Fire retardant – passes Cal TB 117

**Stain- and oil-resistant Fluidproof, will not absorb moisture Non-toxic. Latex-free. Lead-free. Rolls up for easy transport, storage and shipping.**

**Optional Accessory**

**RISK MANAGER™ GRIP STRIPS**

For use on highly-polished floors where extra slide resistance may be desired.

*(Included as standard with XL version.) Item # 43398 (3/Pack) (2” wide x 14” long)*
**Talk about innovation!**

Perhaps Span-America’s best-known product, Geo-Matt, was designed and tested in the early 1980’s in conjunction with the well-known Institute for Rehabilitation and Research (TIRR) at the Baylor College of Medicine.

Geo-Matt was the very first overlay engineered specifically to counter each of the major causative factors in the formation of pressure ulcers: direct pressure, shearing, friction, and the build-up of heat and moisture.

Configured with more than 800 precision-cut individually articulating cells in three distinct zones, its smaller cells give contoured support to the head and lower extremities, while the larger cells support and comfort the heavier thighs and torso.

Once launched commercially, its combination of pressure ulcer prevention and user comfort quickly made it the overlay of choice in facilities throughout the US. In the years since, we’ve incorporated its geometry throughout our product lines, from seat cushions to mattresses to patient positioners.

**Exclusive “Ring-of-Air”**

helps to ventilate surface, channeling heat away from the patient.

**More than 800 individual cells**

respond independently to absorb pressure points and minimize shearing.

**Unique Soft Skin® Sleeve**

protects the overlay, is vapor permeable but resistant to liquids, and doesn’t interfere with support surface function.
The #1 Selling Therapeutic Foam Overlay in the U.S.
Geo-Matt therapeutic overlay is used by thousands of hospitals and nursing homes throughout North America, and has been for close to two decades. Its innovative, clinically proven design (see previous page) provides economical yet effective performance in a wide variety of care settings. Standard size is 33” wide by 72” long by 3.5” high. Weight limit 250 lbs. Other configurations, sizes, and covers are available to meet the special needs of the O.R., long term care, and pediatric/neonatal population.

Geo-Matt Therapeutic Overlay with Cover

Vinyl/Nylon cover with antibacterial agent built in. Side zipper with flap provides protection from fluids. Durable side elastic bands help secure overlay to mattress. Easy to clean and maintain.

Quick Facts
Geo-Matt®

Primary Use:
- Pressure ulcer prevention in mod-high risk patients

Key Advantages:
- Proven effective in prevention and healing*
- Independent foam segments address pressure and shear
- Ring-of-Air® channels minimize heat and moisture

Made from high-quality, combustion modified poly-urethane foam. Specifications vary to address any level of surface discomfort. All pads are 72”x 34”W, and are compression rolled for efficient storage.
Span Seating Products

No wound care protocol or patient care plan is complete until seating needs are addressed. So, whether the goal is complete pressure removal at the ulcer site, chronic pain relief, therapeutic positioning, pressure ulcer prevention, or simple comfort, Span America offers a variety of innovative seating solutions to achieve it.

Clinically-proven Geo-Matt® segmented top surface provides pressure management and shearing control. It also aids in the dispersion of heat and moisture through exclusive Ring-of-Air® channels at the base of each independently articulating segment.

*Featured on:* Geo-Matt Contour, Geo-Matt Wedge, Geo-Matt PRT, Geo-Matt 4” cushion.

Positioning features — including “bucketing” to hold the pelvis in place and contoured channels to maintain the thighs in parallel alignment — help the user maintain a more healthful upright posture while playing an important role in fall prevention.

*Featured on:* Geo-Matt Contour, EZ-Dish, Equalizer, Isch-Dish, Isch-Dish Thin.

Pressure Elimination at the ulcer site is a key to ulcer healing. Since 1989, the pressure-eliminating pocket design of the Isch-Dish has provided the only ready-made solution for completely offloading sitting pressure from the ischials and coccyx.

*Featured on:* Isch-Dish

Durafilm™ Coating a proprietary method of fusing a durable, waterproof barrier to foam increases the longevity of the product.

*Featured on:* Isch-Dish, Isch-Dish Thin.

Span America
Innovative Solutions
Seating

Category: Treatment with Positioning

Isch-Dish®
The most direct seating solution for those with, or at high risk for pressure ulcers at the ischium or coccyx. Exclusive fit-to-the-user, open pocket design provides pressure elimination and ventilation at the ulcer site. An important complement to any wound treatment, and for long term prevention. Promotes healthy, upright posture by controlling pelvic tilt. Reduces “sacral sitting” that can cause skin breakdown. Includes support core protected by Durafilm™ incontinence-proof coating, machine washable cover, removable Sling-Fill seat base (see page 33), 2-year warranty. Height 3.5”. Weight limit for standard models 250 lbs.

Isch-Dish® Thin
Pressure relief, positioning, and pain relief for those not at high risk for pressure ulcers. A full 1.25” lower than the standard Isch-Dish. Great for sensate users, including stroke and geriatric patients, and for those with chronic sitting pain due to injury or illness. Ideal for hemi-chairs, office chairs, and car seats. Preferred by active users in lightweight wheelchairs. Includes support core protected by Durafilm™ incontinence-proof coating, machine washable cover, removable Sling-Fill seat base (see page 33), 2-year warranty. Height 2.25”. Weight limit 250 lbs.

HOW TO MEASURE ISCHIAL SPAN:
Place patient lying down on their side with knees pulled toward chest. Feel for ischials as pictured in drawing. Measure the distance from the center of one ischial tuberosity to the center of the other. The distance measurement is the ischial span.

DETERMINING POCKET SIZE:
• If the Ischial Span is – 4.25” – 5 in. = small pocket
5” – 5.75 in. = medium pocket
5.75” – 6.75 in. = large pocket
• Next – Then measure seat (width and length), choose item # from above.

QUICK FACTS

Use for:
• Pain relief
• Prevention & treatment of skin breakdown
• Assistance with positioning

Fire barrier versions can be ordered to conform with 2000 NFPA 101 (Life Safety Code) and Cal TB# 133 by adding “-29” to item number.
**The Equalizer**

The multi-component construction of the Equalizer contoured positioning cushion features an ultra-comfortable viscoelastic “memory foam” top, a contoured foundation layer for proper positioning of the legs, and an extra-soft relief zone for high-risk bony prominences.

Three zones of a proprietary, gel-like soft polymer provide added pressure dispersion under the thighs, greater trochanters, and ischial/tailbone region. Moisture-resistant cover has a rugged nylon bottom with a 2-way stretch fabric top and convenient front carry handle. Built-in sleeve in bottom of cover allows use of molded Sling-Fill™ base (not included-see page 33) for added stability in fabric sling seats; 2-year warranty. Average weight: 4 pounds. Height: 3.5”. Weight limit 250 lbs. (500 lbs. on Bariatric sizes.)

For sizes 22” or wider, use E2608.

**EZ-Dish**

A comfortable viscoelastic “memory foam” top molds to the anatomically shaped, round-edged pocket below in the high density bottom. Pocket reduces pressure on ischials and coccyx. Bottom layer is contoured to encourage healthy, upright posture and proper positioning of the legs. Cover consists of anti-slip top surface and non-skid bottom. Built-in sleeve in bottom of cover allows use of molded Sling-Fill base (not included-see page 33); 18-month warranty.

Height: 3”. Weight limit 250 lbs.

Fire barrier versions can be ordered to conform with 2000 NFPA 101 (Life Safety Code) and Cal TB# 133. To order, replace the “-96” suffix with “-29” in item number.
Geo-Matt® Contour

Exclusive Geo-Matt® anti-shearing layer on top, firmer contoured base below creates outstanding positioning and effective pressure redistribution in one. Base features contoured leg channels, abduction/adduction build-up, and pelvic bucketing to help discourage slouching. Standard cover consists of anti-slip top surface and non-skid bottom. Built-in sleeve in bottom of cover allows use of molded Sling-Fill base (not included—see page 33); 18-month warranty. Height: 3". Weight limit 250 lbs.

Medicare Code: Skin Protection—E2603.

Geo-Matt® Wedge Cushion

High resiliency, high density foam wedge has a 4" (front) to 2" (back) taper that helps keep users’ hips from sliding forward. Facilitates restraint-free positioning without compromising skin integrity, thanks to its tissue-friendly Geo-Matt® surface geometry. Cover consists of anti-slip top surface and non-skid bottom. Built-in sleeve in bottom of cover allows use of molded Sling-Fill base (not included—see page 33); 18-month warranty. Weight limit 250 lbs.

Medicare Code: General Use – E2601.
### Geo-Matt® PRT (3” high density)
Modification of Geo-Matt’s time-tested design creates lower, firmer base needed by more active wheelchair users. Same individually responsive cells, Ring-of-Air® heat/moisture reduction, and pressure redistribution as original Geo-Matt. Cover consists of anti-slip top surface and non-skid bottom. Built-in sleeve in bottom of cover allows use of molded Sling-Fill base (not included-see page 33); 18-month warranty. Height 3”. Weight limit 250 lbs. (4” height/500 lb. weight limit on Bariatric sizes)

Medicare Code:  
Skin Protection – E2603  
(only versions with fabric cover).  
For sizes 22” or wider, use E2604.

### Geo-Matt® (4” medium density)
Proven design provides outstanding pressure redistribution and comfort. Unique geometry creates individually responsive cells that reduce shearing and cradle bony prominences. Ring-of-Air® design helps reduce heat and moisture build-up; 18-month warranty. Height 4”. 

All models 18”W x 16”L.  
Weight limit 200 lbs.

Medicare Code:  
Skin Protection – E2603 (only versions with fabric cover).
### Seating

**Category:** Basic Prevention and Comfort

#### Soft-Pedal™ Low-Profile Cushion

Multi-layer design with a memory-foam top, silicone gel (SynerGel™) pad insert and high-density foam base, provides comfort and support, and just 1-7/8" high. Ideal for self-propelled wheelchair users, or those who require or prefer a low-profile cushion. Includes a wipe-clean cover with a non-slip top and non-skid bottom.

![Soft-Pedal Cushion](Image)

#### Cross Cut Cushion

Economical prevention and comfort. Provides pressure dispersion and patient comfort through segmented top surface. Cover consists of anti-slip top surface and non-skid bottom. Built-in sleeve in bottom of cover allows use of molded Sling-Fill base (not included—see below); 1-year warranty. Height 3".

Medicare Code: General Use – E2601.

#### Convoluted Comfort Cushions

Convoluted comfort cushions are made from high-quality polyurethane foam. Specifications vary to meet differing levels of discomfort.

*Note: Convoluted cushions are effective as a comfort measure only, and are not intended for use by patients at risk for pressure ulcers.*

![Convoluted Cushion](Image)

#### Sacral Dish™

Pressure elimination, positioning, and increased comfort for those with, or at high risk, for sacral and coccygeal pressure ulcers. Provides pressure-free, ventilated protection at sacrum. Semi-rigid back base and unique shape create supportive foundation to fill in chair’s back upholstery. Designed to work in concert with Isch-Dish cushions. 2 year warranty.

### Category: Specialty Seating Accessories

#### Sling-Fill™ Base

Molded ABS plastic insert fills in the gap created by fabric slings. Creates a flat, rigid foundation where needed. One size fits all. Included standard with all Isch-Dish cushions. Fits into sleeve sewn into all covers on cushions with “-*96*” suffix.
Geo-Wave®
Specialty Recliner Cushion

Proprietary Wave Profile
Unique segmented fins are specifically engineered to address the effects of reclining-induced shearing that is typical of institutional seating. Patented design has three distinct zoned orientations to reduce shear in multiple directions for specific seating areas. Use of this cushion also helps to reduce pressure when the user is in the upright or reclined position.

Simple Secure Attachment
Three elastic hook and loop straps located at the head, torso and foot help anchor the cushion to the chair.

QUICK FACTS
Primary Use:
• Minimizes shear and pressure typically found in institutional seating.

Key Advantages:
• Reduces effects of shearing
• Assists with positioning of user in the chair
• Wipe-clean, non-skid cover

Span+Aids® Patient Positioners

Category: Extremities

**Foot Drop Stop – Standard**
Elevates heels, supports ankle position. Adjustable strap can accommodate ankle contracture, protect against foot drop. Square base provides stability. Ring-of-Air® design provides ventilation.
50638-511 6/cs

**Foot Drop Stop – Original**
Similar to standard version (above), except hexagonal base maximizes comfort by allowing user to lie with leg in multiple positions.
55555-01 6/cs

**Cradle Boot – Original**
Floats heel, supporting foot in neutral position, prevents external leg rotation.
55555-02 6/cs
50644-315 6/cs

**Cradle Boot – Standard**
Floats heel, supporting foot in the neutral position. Well-ventilated boot is easy to use and apply. Square base provides stability, discouraging leg rotation.
50644-515 6/cs

**Limb Elevator**
Elevates casted or uncasted leg. Can be used in both supine and side lying positions.
50632-508 6/cs
50632-308 2/cs

**Flared Leg Extension**
Elevates leg and knee in extended position.
SP291-000 2/cs

**Leg Trough**
Immobilizes leg and knee in neutral position. Base is contoured to posterior leg.
SP033-000 2/cs

**Upper Limb Positioner**
Positions the entire upper arm with sloped groove for stability and comfort. Initially designed for use with burn patients.
SP121-000 2/cs

**Cock-Up Splint**
Designed to help maintain hand and wrist in a desired position. Holds fingers and thumb opposed to prevent contractures. Hand stirrup is adjustable.
50640-512 8/cs

*Indicates items vacuum packed to save storage. All items conform to California Technical bulletin 117.
Span+Aids® Patient Positioners

Category: Surgical & Post Operative

NOTE: In addition to the specialty surgical positioners listed below, many other Span Positioners can also be used for site-specific positioning during surgical procedures.

Open Heart Surgery Kit
Holds each leg in externally rotated position for vein presentation. Special cuts allow for drainage tubes and sensors.
50666-525 *Open Heart Kit
(each kit includes
2 leg positioners,
2 heel protectors,
2 leg toppers) 6 kits/cs
50666-625 *Replacement toppers
6 pairs/cs
50676-376 Economy Kit
(2 leg positioners only)

O.R. Table Pillow
Used during surgery in supine or lateral position to provide support for sensitive areas of the head. Segmented squares offer maximum pressure dispersion, especially during prolonged surgical procedures.
50654-519 10/cs
(Other head products page 34)

Axilla Cuff
Supports and protects axilla and upper arm during surgery.
SP010-000 12/cs

Total Knee Leg Elevator
Used in knee replacement surgery, elevates leg in flexed position.
SP195-000 1/cs

90° Leg Elevator
Bends knee at 90° angle. For use during surgery or physical therapy.
SP196-000 1/cs

Thoracotomy Arm Sling
– Standard
Used with an ether screen bar, it positions hand and wrist for access to thoracic cavity without occluding IV. Adjustable hand strap allows multiple wrist positions.
50668-526 *12/cs
– Economy
(Does not include hand strap.)
50676-373 12/cs

Laminectomy Arm Cradle Set
For use in prone position. Restricts rotation of arm, cushions axilla and provides firm support for entire limb.
50670-527 *12 pairs/cs

*Indicates items vacuum packed to save storage. All items conform to California Technical bulletin 117.
Span+Aids® Patient Positioners

Category: Surgical & Post Operative

Heel Protector
Provides comfort and protection for low to moderate risk users. Adjustable strap allows a custom fit.
SP217-000 20 pairs/cs

Axilla Cuff
Supports and protects axilla and upper arm during surgery.
SP010-000 12/cs

O.R. Table Pillow
Used during surgery in supine or lateral position to provide support for sensitive areas of the head.
Segmented squares offer maximum pressure dispersion, especially during prolonged surgical procedures.
50654-519 10/cs

(Supports and protects axilla and upper arm during surgery)

Thoracotomy Arm Sling
– Standard
Used with an ether screen bar, it positions hand and wrist for access to thoracic cavity without occluding IV.
Adjustable hand strap allows multiple wrist positions.
50668-526 *12/cs
– Economy
(Does not include hand strap.)
50676-373 12/cs

Abduction Pillow with Contour & Comfort Band
Adjustable Velfoam straps with contoured leg channels and a cotton comfort band.
SP122-000 SML (18x12x4x7) 6/cs
SP119-000 MED (22x14x4x7) 6/cs
SP119-000 WIDE (26x19x7x7) 2/cs
SP131-000 LRG (25x16x6x7) 6/cs

Schaeffer Abduction Pillow
Adjustable foam straps, comes with a pair of cradle boots to prevent heel breakdown.
50652-540 *MED (23x14x4x7) 4/cs

Elbow Protector
Comfortable protection with adjustable strap.
SP190-000 20 pairs/cs

Sacral Pad
Cushions sacral area during surgery. Segmented squares in center help disperse pressure.
SP019-000 12 pairs/cs

Ulnar Nerve Protector
A full six inches wide, the ulnar nerve protector provides protection to ulnar nerve and elbow. Adjustable ventilated design.
50675-010 12 pairs/cs

Ulnar Nerve Protector
A full six inches wide, the ulnar nerve protector provides protection to ulnar nerve and elbow. Adjustable ventilated design.
50675-010

O.R. Armboard Pads
Comfortably supports entire arm during surgery when used on O.R. table armboards.
50676-378 12 pairs/cs

Foam Positioning Rings
All-purpose pressure dispersion and comfort.
SP238-000 7” Wx1.75”H 48/cs
SP0676-374 8” Wx3”H 12/cs
SP239-000 9” Wx1.75”H 32/cs
SP167-000 8” Wx1.75”H 24/cs

Size Guide
If patient is:
less than 5’ tall use SML
5’1” to 5’11” use MED
6’0” to 6’5” use LRG
All items conform to California Technical bulletin 117.

*Indicates items vacuum packed to save storage.

Span+Aids® Patient Positioners

Category: Head & Body

**Head Support**
Helps disperse pressure around cranium. Cutout floats ear when in the lateral position, or occiput when in supine position.

- SP230-000 Standard Density 12/cs
- S0676-371 Economy Density 12/cs

**Pediatric:**
- S0676-372 Economy Density 12/cs

**Geo-Matt® Pillow**
Comfortable support for head and neck. Disperses pressure via hundreds of segmented cells. Comes with Soft Skin® protective cover.

- 50960-200 6/cs

**O.R. Head Positioner**
Same as Head Support (above), but slotted to provide clearance for tubes during prone (face-down) procedures.

- SP124-000 12/cs

**Geo-Matt® 30° Body Wedge**
Segmented surface provides pressure dispersion while supporting trunk at a 30° angle. Also used to support arm or leg in side lying, or at foot of bed to prevent sliding in supine or gached position.

- (7 3/8" x 11 5/8" x 20")
- 50960-300* 6/cs
- 50960-301 2/cs (includes fire retardant Soft Skin®)
- 50960-300-96 6/cs (includes vinyl cover)

**45° Body Wedge**
Supports the entire length of the torso.

- S0630-507* Standard 6/cs (9" x 10-1/2" x 24")
- S0630-307 Economy 2/cs (8" x 10-1/2" x 21")

**Positioning Roll**
Useful for various positioning needs, including cervical or popliteal support.

- SP266-000 5" Diameter, 17" L 9/cs
- S0676-377 5" Diameter, 12" L 12/cs

**Wedge**
For lateral positioning and turning.

- SP265-000 (18" x 8" x 8") 8/cs
- SP039-000 (16" x 17" x 9") 6/cs

*Indicates items vacuum packed to save storage.
All items conform to California Technical bulletin 117.
SilverCare™ Gel Positioners

Reusable Gel positioners made with SynerGel™ — a temperature-stable silicone gel. The contact surface is infused with a safe silver additive — SelectSilver®. These reusable positioners provide exceptional support and comfort, and readily conform for patient stability and pressure redistribution.

Additional features: • Positioners can be warmed or cooled depending on patient requirements 
  • Durability – won’t leak or evaporate 
  • Non-toxic, non-flammable 
  • Silver infused film surface wipes clean easily with hospital grade disinfectant

Head Donut: to position the patient’s head and provide easy access to the head and neck. Protects the head, neck and ears during surgery or other procedures.

Skin Care

Category: Antifungals, Moisturizers and Zinc Oxide Barriers

SELAN+®
Takes the Mess Out of Zinc Oxide.
Selan+ is a greaseless product that absorbs quickly into the skin without leaving behind the sticky, white and hard-to-remove residue normally associated with zinc oxide products. Use Selan+ products for added protection from incontinence, wound exudates, perspiration and other body fluids. Unlike petrolatum-based products, they will not impede absorption of urine into diapers and disposable briefs.

QUICK FACTS
Selan+ Zinc Oxide Barrier Creams & Lotion
Primary Use:
• Treatment and prevention of diaper rash and other rashes due to moisture, stage one pressure ulcers, amputee tissue trauma, and the itch associated with end stage renal disease

Key Advantages:
• Satiny smooth
• Absorbs quickly
• Leaves no greasy residue
• Won’t clog disposable briefs

SELAN Protective Cream and Lotion
The Original Treatment and Prevention Formula.
When barrier protection is not needed use Selan Protective Creams and Lotions to treat and prevent dry or chapped skin and skin tears.

QUICK FACTS
Selan Protective Cream & Lotion
Primary Use:
• Treatment and prevention of dry or chapped skin and skin tears

Key Advantages:
• Greaseless formula absorbs quickly
• Improves skin elasticity
• Economical

SELAN+® AF Antifungal Moisture Barrier Cream
There is no longer a need for separate moisture barrier and antifungal products. Now you can have the proven advantages of SELAN+® with added Antifungal protection.
The 2% miconazole nitrate is an effective treatment against most athlete’s foot, ringworm, jock itch and superficial yeast infections. Plus the dimethicone and zinc oxide ingredients provide a barrier to protect skin from incontinence and other harsh environmental conditions.

QUICK FACTS
SELAN+® AF Antifungal Cream
Primary Use:
• Treats and cures most superficial yeast infections, athlete’s foot, ringworm and jock itch.

Key Advantages:
• Soothing relief
• Protects against moisture
• Absorbs quickly
## Why Span-America?

**History & Stability**
- Recognized leader in health care products for more than 30 years.

**Technology & Innovation**
- Ongoing Research and Development efforts have yielded more than 50 US and international patents.
- 40 percent of annual medical sales are typically generated from products introduced in the preceding three years.

**Clinical Support & Documentation**
- Large body of clinical studies, abstracts, and pressure mapping.
- Certified Wound Care specialist on staff to answer your product questions and provide in-depth assistance on product selection, appropriateness and application.
- Multiple Clinical Studies available.

**Quality & Safety**
- Management commitment to the quality system drives customer satisfaction and continuous improvement in products and services.
- Rigorous standards ensure the quality of design, manufacture, final product testing, and delivery to the customer.
- ISO 9001 and ISO 13485 certified for all PressureGuard® specialty treatment support surfaces.
- All products conform to applicable flammability codes.

**Customer Service & Satisfaction**
- Courteous, knowledgeable customer service representatives.
- Unconditional warranties.
- 30-day clinical trials for facilities available upon request.

**Manufacturing & Shipping**
- Newly expanded 200,000 sq. ft. manufacturing plant in Greenville, SC plus East and West (SC and UT) warehousing / shipping locations give us maximum control, flexibility, and efficiency in building and delivering product to our customers.
