PressureGuard® Protocol®
Microclimate Management with Alternating Pressure Therapy

Effective.
Proven active pressure redistribution and microclimate management.

Efficient.
Patented “Air Diffusion Matrix™” design generates less noise, uses less power.

Exceptional.
Unmatched combination of air therapy, safety, stability, comfort and ease of use.
PressureGuard® Protocol®
Delivering High Value, High Performance in Microclimate Management.

Our newest air therapy system brings together two time-tested design exclusives:

- **Proprietary “Air Diffusion Matrix”** offers direct delivery microclimate management (“low air loss”) for control of excess moisture.
- **Clinically proven PressureGuard® integrated air system/engineered foam shell design** for an ideal combination of immersion, envelopment, shearing reduction, active air therapy, fall prevention, comfort, stability, fast set-up and ease of cleaning.

Efficient system design generates substantially less noise and consumes less than half the power of many traditional, blower-based “roll-up” surfaces.

- **Alternating pressure mode** gently changes loading across the surface in a 10-minute cycle.
- **“Float” mode** provides powered flotation therapy.
- **Simple comfort adjustment**, including ultra-soft “Max. Immersion” setting for users under 120 lbs.
- **Selectable audible alarm and indicator light** for low pressure notification.
- **Timed (30-minute) “Auto Firm” function** for added stability during transfers, ADLs & CPR.
- **Can maintain inflation during power interruption** and transport.

**Span Exclusive: Patented microclimate management design** protects vulnerable skin by supplying a gentle, uninterrupted flow of air to help eliminate excess moisture.

**Outer coverlet**
- vapor-permeable, yet fluid-proof
- Air Diffusion Matrix™ layer outperforms typical batting
- wipes clean in place with standard hospital-grade cleaners
- machine launderable

**Inner air delivery cover**
- dedicated air supply
- continuous airflow through Air Diffusion Matrix™ layer
- sweeps away moisture vapor before it can re-form as a liquid
- reduces maceration, especially effective at the sacrum

**The PressureGuard Advantage:**

- **Geo-Matt® segmentation** Provides tissue-friendly, non-shearing top surface.
- **Safety Edge™ design** Ensures safer transfers, minimizes risk of falls and entrapment.
- **Protective Heel Slope™** Redistributes pressure away from vulnerable heels.

Raised Perimeter models add an extra measure of safety by helping to prompt the user away from edge of bed.

---

### Item # Description

**All models include mattress, coverlet and control unit**

**Control unit:**
- Weight: 11.5 lbs.
- Dimensions: 14"x 9.25" x 6.5"
- Voltage: AC 110-120V
- Frequency: 60 Hertz
- Certification: CAN/CSA-C22.2
- No.60601-1-08 and AAMI ES60601-1:2005

**Flammability:**
- Conforms to NFPA 101 (Life Safety Code) / ASTM E1590;
- Cal Tech Bulletin #117 (2013); 16 CFR Parts 1632 and 1633.

**Indications:**
- Excessive perspiration or maceration; treatment of Stage I-IV pressure ulcers; prevention for high risk patients.

**Medicare Coding:**
- Meets requirements of E0277 (Group II)

**Weight limit:**
- 400 lbs. (500 lbs. at 42")

**Mattress weight:**
- approx. 22 lbs. (28 lbs. at 42")

**Warranty:**
- 18 months non-prorated
