Now available: Tool-less expansion to 42”

Attach easy-on expanders tool-less to both sides of the head, seat and foot decks after corner mattress retainers have been removed.

Spring-driven latches beneath the expander units attach firmly to the deck providing a 42” deep surface for user comfort, fall prevention and ADLs.

Our molded plastic and metal half-head assist rails are both compatible with the expanders, mounting securely to the expanders before installation.

Standard features include:
- Precision welded orthopedic grid decks
- Durable, anti-microbial polyester powder-coating of metal components
- Smooth deck designs for easier cleaning
- Mobility at any height
- Vascular foot rest with easy ratchet operation
- Beds move vertically with virtually no horizontal motion
- Arched legs allow wide stance for clearance and stability
- Honeycomb bumpers protect walls
- Pendant bed controller

Optional features:
- 42” Tool-less bed expanders
- Floor end controller with lockout
- Molded half-head assist rail
- Dollies for streamlined bed logistics and maintenance
- Stylish head and foot board options
- Bed extenders
- Mobility options including floor level locking

**Build your own Span bed online with our interactive configurator at www.configurebed.com**

**Rexx & Rexx Fast**
Span’s low-bed design advantages with fast-rising technology.

Meets OSHA Guidelines
Meets the recommended adjustment time of 20 second or less as outlined in the OSHA* guidelines.

Full Mobility at any Height
Staff maneuvers from upright – not hunched-over position – provides safer, quicker relocation.

42 Inch Tool-less Expanders
Easily attach expanders for wider sleeping and caregiving surface; remove expanders tool-less to steer bed through narrow doorways.

As a fast-rising bed, Rexx Fast can also be expected to reduce staff injuries related to stooping, lifting and repositioning the resident.

Excerpts from OSHA Publication 3182-3R 2009: a study in which 58 fast-rising low beds were purchased as a key equipment component in a nursing home ergonomics program to address caregiver injury and turnover rates and related operating expense including workers’ compensation costs.

“...reports that, after the program was implemented workers’ compensation costs declined from an average of $140,000 per year to less than $4,000 per year.

Explained why she liked the new beds so much. “We can quickly bring the bed up to our work height with a push of a button and we can reposition a resident . . . with ease without bending or stooping.”

Soft honeycomb roller bumpers safeguard the walls when the bed is raised or lowered.

Decks have smooth upper surface for easy disinfection – preferable to decks with protruding welds.

Optional, pleasant to touch molded plastic half-head assist rails. All rails also available in steel.

Optional 3-Position side assist rail offers dependable ingress-egress support.

An efficient vascular foot rest elevates the legs without the need for pillows/bedding.

Orthopedic grid decks engineered with guaranteed precision robotic welds for flexible, ventilated, no-sag support.

The bed adjusts vertically with virtually no horizontal motion, saving space and protecting the bed environment.

Optional full 360° mobility and lockability at any height for safer, ergonomic bed relocation.

In addition to the standard pendant controller, a foot-end control with staff-only lockout is available.

Choice of 7 finishes and 8 head board profiles.
